

CONTROL-M BASIC SCHEDULING

CLASS DURATION	5 Days
PRICE	Per Student
FIND OUT MORE	Call 1.800.513.2957

This five-day class is an introductory class designed to provide Control-M schedulers with the knowledge and skills need to understand, navigate and work in a production environment.

Providing a broad overview of the features of BMC Control-M, this class explores the tools available for monitoring and managing the active environment, including all jobs and workflows for an enterprise. Interactive Labs and hands-on exercises are woven into the learning experience to enhance and reinforce key learning areas of job scheduling.

Our methodology has evolved over years of practical experience delivering workload automation training. Students successfully completing this class will leave with the skills and knowledge needed to immediately apply their knowledge in the workplace. At the end of this class basic scheduling students will be able to confidently build, implement, troubleshoot and manage daily business operations.
